João Victor da Silva Almeida Guimarães

Software Development Intern | Java, Spring Boot, Python and SQL

Campina Grande, PB, Brazil | joaovictorsag@hotmail.com | linkedin.com/in/joaovictorgdev | github.com/Joaodev1409

PROFESSIONAL SUMMARY

Computer Science student (UEPB, expected graduation 2028) and teaching assistant for Advanced Programming Methods, with hands-on experience in **Java** and **Spring Boot**, **Python**, **PostgreSQL**, **REST APIs** and **React with TypeScript**. Helped build an online enrollment system that has received over 1,200 enrollments, cut average request time of a Python back-end by 73%, and shipped a Spring Boot web app with automated tests. Uses AI in day-to-day development (Claude Code). Seeking a back-end or data engineering internship.

SKILLS

Languages and front-end: Java, Python, SQL, TypeScript, JavaScript, C, React, Vite, HTML, CSS

Back-end: Spring Boot, Spring Security (OAuth2), Spring Data JPA, REST APIs, Flask, Node.js

Data: PostgreSQL, MySQL, Flyway, Pandas, ETL, relational data modeling, BI and dashboards

Testing and DevOps: JUnit, Testcontainers, Docker, Docker Compose, Git, GitHub, Render, Vercel, Postman

Applied AI: Claude Code, prompt engineering, harness engineering (skills for AI agents)

Fundamentals: OOP, design patterns, SOLID, GRASP, agile methodologies, code review, Jira

PROFESSIONAL EXPERIENCE

Teaching Assistant, Advanced Programming Methods (MAP) | State University of Paraíba (UEPB)
08/2026 – Present

- Support students in **design patterns**, **SOLID**, **GRASP** and object-oriented programming.
- Students' help requests were getting lost in group chats. Built **Monitoria MAP**, a support queue that notifies TAs in real time (SSE, e-mail and browser notifications) and records who handled each request and how long it took, generating the TA report as CSV.
- Back-end in **Java 17** and **Spring Boot 3** (REST API, Spring Security with Google login, JPA, Flyway, PostgreSQL) and front-end in React with TypeScript; applied the State, Observer, Strategy and Facade patterns, documented as course material.
- Wrote 59 automated tests (**JUnit** and Testcontainers) and deployed the system with **Docker** on Render and Vercel.

Google Student Ambassador | Google, UEPB campus
2026 – Present

- Run workshops and campus events on **Google AI** tools such as Gemini and NotebookLM.
- Help peers use these tools in their studies and create social media content promoting the program.

Developer – ProgClubCG Outreach Project | State University of Paraíba (UEPB)
2025 – Present

- Building a gamified, Duolingo-style app for teaching **Java** and OOP, planned in sprints.

IT Intern | Colégio Panorama
08/2025 – Present

- Enrollment was 100% in person, with long queues, an overloaded front desk and temporary hires every term. Helped the team build the **online enrollment system**, from concept to implementation: requirements, stack choice and development. The system has now received over 1,200 enrollments.
- The main challenge was making enrollment legally binding: implemented digital signatures from both the guardian and the school, plus contract validation.
- Develop **ETL** jobs in **Python** that pull data from the Sponte API into the internal BI, inspired by Power BI, with financial and academic dashboards the school board uses for decision-making.
- Configure servers and maintain production applications on **PostgreSQL**; work directly with end users, gather requirements and manage projects through delivery.

Full Stack Development Intern | Nutes-PB
Remote | 08/2025 – 09/2026

- Built the entire back-end of the **SEFAZ-PB invoice monitoring system** in **Python** (Flask, SQLAlchemy, pyodbc): tax database status routes, load history and dashboard.
- Queries hit the servers one at a time: parallelized the calls with ProcessPoolExecutor and rewrote the **SQL** queries, cutting average request time by **73%**.
- On the front end, implemented the loads screen, the progress bar and data export; worked with code review (Git), API testing in Postman and Jira sprints.

EDUCATION

B.Sc. in Computer Science | State University of Paraíba (UEPB)
Currently enrolled, expected graduation 2028. Took part in hackathons and programming contests.

CERTIFICATIONS

- **Ada Track – Data Structures** | Santander Coders | 2023
